

simplify your IoT deployments and be future-ready with **Vi[®] C-DOT IoT lab**

Standardisation

Inter-operability

Certification

This **Vi C-DOT IoT lab** offers a platform for service providers to launch an unfailing, interoperable, standard-compliant product in the market by eliminating budding issues through comprehensive testing prior to the product's launch.

The IoT lab has the capability to test a wide spectrum of ecosystem components ranging from device, modules, SIMs, application and more. The IoT lab acts as an ecosystem orchestrator and influencer that brings together all stakeholders across the IoT industry.

why should your business rely on **IoT lab?**

Capability to Test 175+ Scenarios

Network & functional testing – indoor & outdoor

Joint Certification

Partnered with C-DOT to harness combined expertise

Technology-agnostic Lab

Capability to test all network technologies and applications

Capability to Test across Use Cases

Most diverse use cases across industries, like AMI, Connected Car, POS, and more

Global Expertise

Global experience and testing proficiency

how does it benefit your business?

Preliminary device testing reduces costly after-the-fact repairs and re-designs, by helping fix device issues before production

Reduction in field issues saves operational costs

Seamless customer experience with an unfailing secure product

Certification increases market value and confidence of Device OEMs

Faster revenue realisation with pre-certification of modules, quicker activation and faster time-to-market

C-DOT and Vi Business have established an IoT incubation center to accelerate the Indian IoT ecosystem's growth by offering **IoT service providers** a tech-led business platform for quicker market entry.

Ensure interoperable and oneM2M compliant solutions today!
